PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of professional experience building responsive, production-grade web applications with React.js, Next.js, TypeScript, and Tailwind CSS. Hands-on experience with REST API integration, authentication, SSR/SSG, state management (Redux Toolkit, Zustand, Jotai), and data fetching with TanStack Query. Delivered e-commerce, booking, and admin dashboard platforms including payment gateway and coupon logic, with a focus on performance optimization, reusable components, and clean, scalable code. Also built a full-stack RAG document chatbot using Next.js, FastAPI, ChromaDB, and Ollama.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python (basic)
Frameworks and Libraries: React.js, Next.js (App Router, SSR, SSG, Server Actions)
State Management and Data Fetching: Redux Toolkit, Zustand, Jotai, TanStack Query, TanStack Table, REST APIs, Fetch API
UI and Styling: Tailwind CSS, Radix UI, Framer Motion, Recharts, Responsive Design
Forms and Validation: React Hook Form, Zod
Integrations: Google Maps API, Payment Gateways, Authentication
Tools and Deployment: Git, GitHub, Postman, Vercel, AWS EC2, PM2, VPS, AI-assisted development (Claude)

PROFESSIONAL EXPERIENCE

Frontend Developer | Zinavo | Jul 2025 – Present

- Developed responsive, scalable web applications using React.js, Next.js, TypeScript, and Tailwind CSS across four client projects: WHEELS, BITE, Sentransfer, and Indbuild.
- Built reusable UI components and responsive interfaces, improving development speed and consistency across projects.
- Integrated REST APIs, payment gateways, coupon and discount logic, and e-commerce workflows, delivering production-ready features against business requirements.
- Implemented authentication flows and protected routes using Next.js.
- Optimized application performance by reducing unnecessary API requests through caching strategies, stale-data handling, and improved frontend data fetching.
- Deployed and maintained applications on Vercel and on VPS and AWS EC2 servers using PM2.

PROJECTS

Sentransfer – UK Transfer and Booking Platform
Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Zustand, React Hook Form, Zod, Google Maps API, TanStack Table, Recharts

- Built multi-step booking flows with Google Maps integration using Next.js, React, TypeScript, and Zustand.
- Developed admin dashboards to manage bookings, users, drivers, vehicles, rescheduling, and cancellations.
- Created data tables and analytics dashboards using TanStack Table and Recharts.

BITE – Bharat Institute of Teacher's Education
Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Jotai, React Hook Form, Zod

- Developed multi-step exam entry and student verification workflows using Next.js and React.
- Implemented live camera capture using the MediaDevices and Canvas APIs.
- Integrated REST APIs and Server Actions for student profiles and exam eligibility checks.

WHEELS – Wheels and Tyres E-commerce Platform
Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Jotai

- Developed responsive product listing and product detail pages for wheels and tyres.
- Implemented advanced product filtering, wishlist, cart, and dynamic pricing features.
- Integrated server-side APIs with stock handling, mobile filters, and loading states.

DocuMind AI – Local RAG Document Chatbot | GitHub: https://github.com/Prasanth-Dev01/documind-ai
Tech Stack: Next.js (App Router), React, TypeScript, Tailwind CSS, Python, FastAPI, ChromaDB, Ollama

- Built a full-stack Retrieval-Augmented Generation (RAG) application that lets users upload multiple PDFs and ask questions in natural language, with answers grounded in document content.
- Developed a FastAPI backend for PDF text extraction, overlapping text chunking, embedding generation (nomic-embed-text), and vector search using persistent ChromaDB storage.
- Integrated a locally hosted LLM (llama3.2:3b via Ollama) to generate context-based answers with source document and page references, with no paid LLM API required.
- Implemented document management, including listing indexed documents and selective deletion of a document's chunks from the vector database.
- Designed a responsive, dark-themed chat interface using Next.js and Tailwind CSS.

EDUCATION

B.E. in Computer Science and Engineering | Shree Venkateshwara Hi-Tech Engineering College, Erode | CGPA: 8.5
Higher Secondary Certificate (HSC) | 85%
